

# Return to Work is here . . . are your meeting rooms return-ready?

**76%**

**of employees  
use video  
conferencing for  
remote work**

**80%**

**of meeting  
rooms do not  
have video**

**98%**

**of companies will  
have a true hybrid  
workforce for the  
first time ever**

Your employees are coming back to the office and their expectations of video conferencing have changed. They expect that your meeting rooms will work with ALL the collaboration platforms just like their PCs do. But will they? They want meeting equity whether they are in-person or remote. Is that a reality? Your chosen collaboration platform is not the one they adopted when working remotely for the past year. What's your plan?

RoomReady is here to help you get your rooms return-ready. Our Tech Lab is set-up to help you actually experience the technology options and how they work together. Let us de-mystify and solve the challenges that come with making new technologies work together in the ever-changing video conferencing and AV landscape.

## What are things you could use your Tech Lab engagement for?

- ▶ Needs analysis – where do we even start?
- ▶ Budget analysis – what would it cost?
- ▶ Scalability analysis – we need a lot more rooms?
- ▶ Demonstrate multiple user experiences
- ▶ Demonstrate different camera options
- ▶ How to join a MS Teams, Zoom, Cisco Webex call from different hardware solutions
- ▶ Compare user experience: MS Teams, Zoom, Cisco Webex calls when joining from different platforms and desktop client
- ▶ Demonstrate user experience changes which have rolled out since you were last in the office
- ▶ Assess how to leverage multiple platforms in the same ecosystem
- ▶ What it takes to add one-button-to-join capabilities
- ▶ How to implement interop solutions

 room ready™  
We innovate. You collaborate.
